

# Motaz Atallah

Senior Angular Developer | Agile Methodologies | Front-End Expertise  
Nablus, Palestine, 00972568144442 | [motazatallah2@gmail.com](mailto:motazatallah2@gmail.com) | [LinkedIn](#)

## Professional Summary

Dedicated Angular Developer with over 6 years of experience in front-end development, specializing in Angular and Agile methodologies. Proven track record of delivering robust airline applications while collaborating with talented teams to manage shared UI components across multiple projects. Expert in web services, component-driven development, and cross-functional team dynamics, with a passion for leveraging advanced technical skills to contribute effectively to mission-critical programs and drive innovation in complex, fast-paced environments.

## Employment History

- Senior Front-End Developer at AppiaTech Outsourcing for Boeing, Ramallah**

July 2020 — Present

  - Directed a team of 5 developers in creating advanced web applications for aircraft management, enhancing operational efficiency and contributing to a 30% increase in client data processing efficiency for large-scale aviation needs.
  - Collaborated closely with UX teams to integrate human-factor principles into the application design, enhancing user satisfaction by 25%.
  - Regularly upgraded to new Angular versions, resulting in improved performance, security, and access to the latest features.
  - Enhanced testing: 90% more coverage, 50% faster test runs (15 to 4 minutes).
  - Successfully designed and implemented OAuth security processes, increasing system security compliance by 40%.
  - Coordinated with back-end developers to integrate RESTful APIs, improving the scalability of the client's digital infrastructure.
  - Implemented a Deployment (CI/CD) pipeline to run the automation tests that reduced time-to-merge the changes from 8 hours to 1 hour.
  - Championed the Agile SCRUM methodology, reducing the product's time to market by 15% while maintaining high code quality.
- Software Engineer at AppiaTech Outsourcing for Boeing, Ramallah**

August 2017 — June 2020

  - Developed and maintained scalable web applications using Angular 8+, with a focus on performance optimization across multiple projects.
  - Enhanced code maintainability by implementing efficient Github branching strategies, allowing for 20+ developers to work simultaneously without conflicts.
  - Selected to collaborate with a talented team responsible for managing shared UI components across multiple projects, which led to a reduction in the effort by other teams by 50%.
  - Contributed to the development of a microservices-based architecture, improving system resilience and facilitating a 35% reduction in downtime.
  - Implemented automated tests, enhancing team productivity by 20%.
  - Engaged in design and code reviews for effective development.
- Software Developer (Part Time) at Isra' Software And Computer, Nablus**

April 2015 — June 2017

  - Integrated the developed POS web application into the company's product lineup, contributing to the expansion of our offerings.
  - Developed a user-friendly POS system for restaurants and hotels, facilitating efficient operations using ASP.NET Web and SQL.
